TRANSFORMATION OF BUSINESS & EXPERIENCE

**INTELLECTUAL CREATIVITY FOUNDATION FOR
COMMUNICATIONS AND INFORMATION
TECHNOLOGY**

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

الابتكار هو القدرة على اتخاذ التغيير، كفرصة.

INNOVATION
IS THE ABILITY TO SEE CHANGE AS AN
OPPORTUNITY

STRENGTH

- ▶ We have over 150 of the region's best-trained IT consultants sharing the new information, being responsive to change, and working through problems & solutions together and taking part to the responsibilities towards the fast growing world of Technology.

Solution

WE OFFER BOTH SOFTWARE, SECURITY AND NETWORKING , SECURITY CONSULTING –LED INTEGRATED PORTFOLIO OF IT, AND IT-ENABLED SERVICES DELIVERED THROUGH ITS DISTINCTIVE BUSINESS DELIVERY MODEL, WHICH IS THE STANDARD OF EXCELLENCE THROUGH STRONG RELATIONSHIP AND VALUES.

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

RESULTS

- ▶ Delivering competitively unmatched and guaranteed real business solutions in IT services and consultancy in the region

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Customer Centric Support

- ▶ Our Team deals in a variety of technology related platforms that expand from providing our end users with the best, transforming and reliable solutions aligning to the organic need with vendor support.

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Business Strategy

- ▶ The Business strategy we have adopted is a long-term plan of action designed to achieve a client's satisfaction oriented business. Our strategy is to strengthen the performance of the enterprise class services to its clients in the region. We try and achieve the same through:
- ▶ Growth
- ▶ Business Opportunities
- ▶ Operational efficiency
- ▶ New Initiatives.
- ▶ Aligned consulting
- ▶ Reputation Risk
- ▶ Operational Risk
- ▶ Internal Efficiency
- ▶ Total cost of owner ship

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Business Solutions

We provide the below business offerings in the region.

Business Infrastructure	Cloud Computing
• Infrastructure Performance Analysis	• Private Deployment
• Storage IOPS – GAP Analysis	• Hybrid Deployment
• Microsoft Infrastructure Review	• Public Deployment
• Virtualization – Business Strategy	• Infrastructure as a Services
• Adoption – Open Source	• Software as a Services
• Communication & Collaboration	• Platform as a Services

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Business Solutions

Business Impact Analysis	Business Consulting	IOT And SAP HANA Initiatives
• Disaster Recovery Consulting • Business Continuity Strategy • Review of RTO/RPO • Traditional Backup • Appliance Backup • Cloud Backup Services	• Penetration Testing • Vulnerability Assessment • Network Design Audits • Network Design & Planning • Data Center Design • Redundancy & Co-Location	• SAP HANA • IoT Initiatives • Business Intelligence • HPC Solution

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Business Solutions

Risk Management	Cybersecurity Initiatives	
• Risk Management	• Web/email/Data Security	• Mobile Device Security
• Risk Detection	• Firewall Solutions	• Real-Time Classification
• Risk Intelligence	• Vulnerability Management	• Anti-Malware Engines
• Risk Landscape	• Sandboxing	• Reputation Analysis
• IT Governance	• Managed Security	• Advanced Threat Dashboard
▪ IT Compliance	• Incident Response	• Advance Threat Dashboard
	• Anti – Phishing Services	• SIEM

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Our IT service Portfolio

1. NETWORK INFRASTRUCTURE.
2. PHYSICAL SECURITY.
3. NETWORK SOLUTIONS.
4. DATA SECURITY.
5. DATA CENTER SOLUTIONS.
6. UNIFIED COMMUNICATION & COLLABORATION.

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Network infrastructure

1. RACKS
2. UPS SYSTEMS
3. STRUCTURED CABLING
4. ENVIRONMENT MONITORING
5. RAISED FLOOR
6. FIRE PROTECTION
7. DATA CENTER DESIGN
8. CRITICAL POWER COOLING.

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Physical security

1. VIDEO SURVEILLANCE
2. INTRUSION DETECTION
3. UNIFIED REPORTING
4. ACCESS CONTROL
5. IDENTITY RECOGNITION
6. SMS (SECURITY MANAGEMENT SYSTEM

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Network solutions

1. LOAD BALANCING.
2. NETWORK MANAGEMENT.
3. WAN OPTIMIZATION ROUTING & SWITCHING.
4. SDN (SOFTWARE DRIVEN NETWORKS).
5. SDC (SOFTWARE DRIVEN DATA CENTER).

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Data security

1. CONTENT MANAGEMENT.
2. BYOD SOLUTIONS.
3. DATA PROTECTION SOLUTIONS.
4. DATA PROTECTION SERVICES
5. SOFTWARE DEFINED DATA CENTER
6. BUSINESS CONTINUITY & AVAILABILITY

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Datacenter solution

1. CLOUD SOLUTION.
2. IT VIRTUALIZATION.
3. ENTERPRISE SERVERS
4. CONVERGED INFRASTRUCTURE
5. VIRTUAL DATA CENTERS SECURITY
6. NEXT GENERATION SECURITY SYSTEMS.
7. DATA SCIENCE & BIG DATA ANALYTICS.

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

Unified communication & collaboration

1. SMART OFFICES – CREATION.
2. MOBILE COLLABORATION.
3. IP TELEPHONY SOLUTIONS.
4. CUSTOMER COLLABORATION.
5. TELEPRESENCE SOLUTIONS.
6. SOCIAL MEDIA COLLABORATION.

Resources, Portfolios & Operations Automation

Resources, Process (Portfolio & Operations) and Functions (hierarchy) Automation - PMO & ITSM Automation & Consolidation

- ▶ For PMO's: It's quite time taking routine (daily, weekly, monthly, quarterly etc.) to manually Manage each & every delegate, Sequence, Compose & Distribute all "Portfolios & Operations" "Updates & Reports" to Management & Delegates, Hence We Provide a Complete Customized ITSM's Flow Automation/Solution by which Management can trace/react with the latest/historic updates of their ongoing Portfolios & Operations with a single click.
 - a. Portfolio Flow (Programs, Projects and Tasks) in its Project-Life-Cycle (PMI Methodology)
 - b. Operations Flow (Strategy, Design, Transition, Operations and CSI in its Production-Life-Cycle (ITIL Methodology)

- ▶ Benefits:
 - a. Accurate Portfolios & Operations Management, Accurate PMO's Process Automation
 - b. Instant Management/Updates/Follow-ups/Escalations/Reporting of each & every individual involved & all happenings in entire Portfolios & Operations.
 - c. Root Cause Analysis & Performance Measurement Report: Knowledge of each & every resources activities & their performance report with how each resource is currently handling the tasks (latest) & how he was handling earlier (historic)
 - d. Statistics: how many resources are involved in each program/project (who are all involved) & which resource is engaged in how many projects/tasks.
 - e. Eliminating the tracking/following-ups need via emails, documents & reports etc. Eliminating resources dedicated to perform reporting & follow-up & escalation activities.
 - f. Centralized Repository containing all information about entire Portfolios & Operations including Updates, Data, Documents/Attachments and Emails etc. (AD Integrated)

Geographical Architecture - Automation

Head Office > Regional Offices > Branches > Data-Centers > Alternate-Data-Centers > Disaster-Recovery Centers Automation & Consolidation

Active-Directory-Group-Policy and Organization-Units Design Compositions: “Compliance & Governance Framework”

To best manage resources time & efforts, security and compliance implementations: Like Head-Office though has multiple departments & groups, we leverage & can develop profiles based on the functionalities upon analysis & standardize: Non-technical-profiles like: Managers, Supervisors & Users (users couldn't be able to perform else other than they are supposed to work on: This will increase the productivity, efficiencies & decrease time/efforts). We'll deliver so via Active-Directory-Group-Policy-Configurations. Technical-profiles like: Developers (SIT & UAT), Implementers (Production), OS, Applications & DB Admins Profiles, Remote-Users (Internal-Staff / Consultants / Vendors-National/International) to secure environments (SIT, UAT, Production, DR & DMZ etc.)

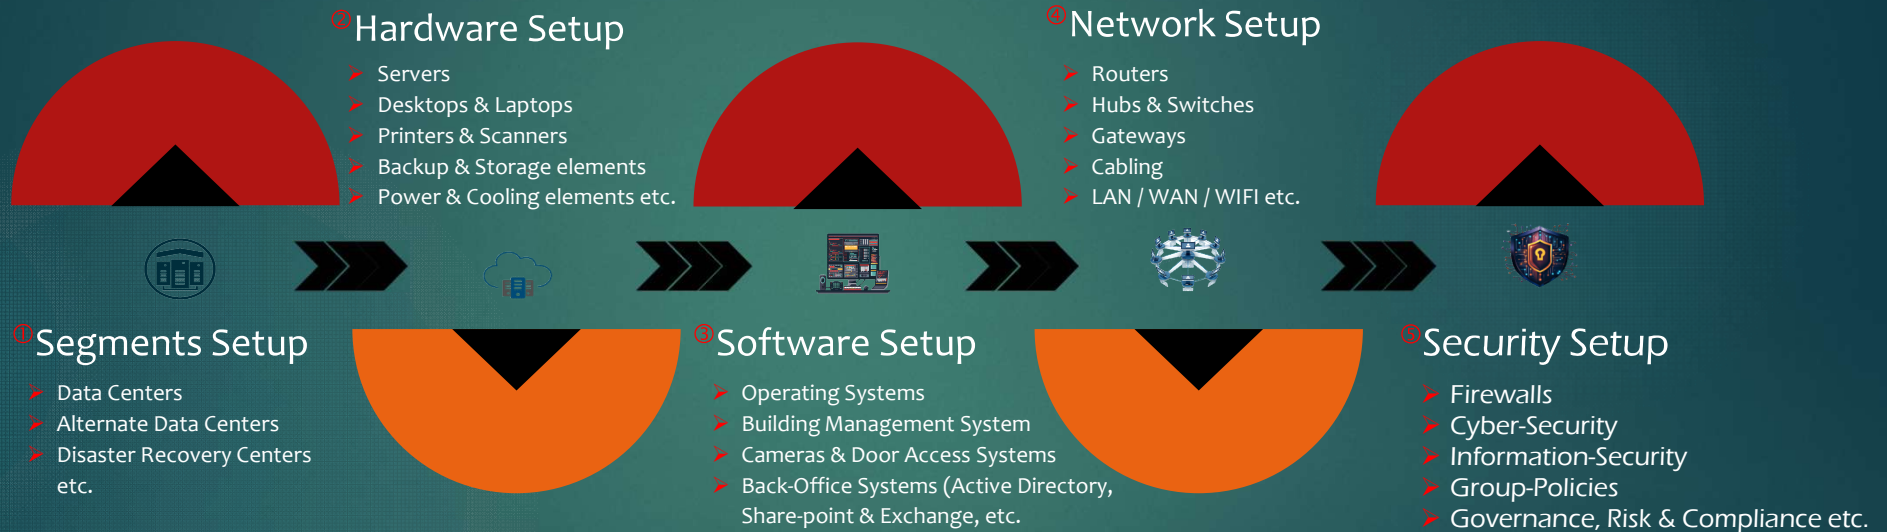

- Standardization of Department Profiles: Information-Technology, Retail-Banking-Group and Corporate-Banking-Group etc.
- Standardization of Group's Profiles: IT (Production-Support, UAT-Support, SIT-Support and DBAs, etc.)
- Standardization of Computer's Profiles: OS-Configurations, Network-Configurations and Applications-Configurations etc.
- Standardization of User's Profiles: Managers-Profiles, Supervisors-Profiles and Users-Profiles etc.

Active-Directory-Groups (Security-Groups) & Email-Groups (Distribution-List) Formation:

To Streamline, Optimize and Standardize Data, Files and Shared-Folders access, since banking is an entity consist of hundreds and thousands of Users. Hence we upon analysis upon uniquely reviewing staff functions to enable data security, easy management via ease distribution of Data and emails as since an establishment need to have essentially an appropriate & flexible groups structure to secure Data and grant access according to the hierarchy structure only. Upon successfully collecting info, we will develop and implement Active-Directory-Groups along the Share-Folder Structure & Personal Folders in the storage farms like NAS/SAN etc. to assign appropriate permissions. We will even contribute in consolidating the existing scattered data to re-organize and streamline access-management and document management solutions...

IT Infrastructure Architecture - Automation

We provide clients with complete, latest & robust infrastructure setup framework resulting in enhancement of business efficiency, security, and growth in today's digital landscape.

Key Benefits of a well-designed IT infrastructure:

- Improved efficiency, Productivity, Enhanced Protection & data security,
- Increased scalability to accommodate growth,
- Reduced IT costs through better resource management,
- Improved collaboration and communication within the company,
- Instant response resolutions to IT issues and emergencies

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

IT Infrastructure Architecture - Automation

Outsourcing: We provide clients with entire hassles free Infrastructure outsourcing framework via beneath, enabling client focusing entirely towards business growth, enhancements, expansions & remain competitive.

Infrastructure Assessment

Offers best Infrastructure Assessment Consideration Options Upon reviewing the unique needs of Client, its goals, and budget.

Infrastructure Implementation

We provide clients with complete, latest & robust infrastructure setup framework resulting in enhancement of business efficiency, security, and growth in today's digital landscape.

Infrastructure Maintenance

We provide clients with not just maintenance, but Transform Managed Services Architecture & Consolidate Infrastructure, for enhanced business availability & continuity via Innovation, Automation & Optimization

Infrastructure Management

Turnkey-System: We Provide Entire Infrastructure Assessment, Implementation, Maintenance & Management from Start Till End, From Initialization till Closure, From Project Life-Cycle to Operations Life-Cycle

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

IT Infrastructure Architecture - Automation

IT infrastructure is the core on which the success of a business is built. Security and flexibility of organization depends & comprised in its IT infrastructure. We do Analysis > Implementations > Maintenance > Management (Outsourcing / Managed Services)

1

IT-Infrastructure Composition

Infrastructure Managed-Service provide clients with complete, latest & robust infrastructure setup resulting in enhancement of business efficiency, security, and growth in today's digital landscape.

Adapting: Project-Life-Cycle (PMP)

2

IT-Infrastructure Maintenance

We provide clients with not just complete infrastructure maintenance, but Transforming Managed Services Architecture & Consolidating backend services platform, for enhanced business availability & continuity via Innovation, Automation and Optimization

Adapting: Operations-Life-Cycle (ITIL)

3

IT-Infrastructure Outsourcing

We provide clients with complete, efficient IT Infrastructure Management enabling organizations perform better and adopt the latest technologies better suited to their needs, helping them survive in complex environments and remain competitive via either Onsite or Offshore Infrastructure (IAAS & PAAS)

Adapting: Information Technology Service Management (ITSM)

We Serve our clients to supplement their organization with implementing entire turnkey-systems & solutions as a solution provider or undertaking programs & projects, maintaining IT services, operations, infrastructure & applications as a service-provider, providing contract staff or completely outsource their department & units

IT Infrastructure Architecture - Automation

Renovation: We provide clients with not just complete infrastructure maintenance, but Transforming Managed Services Architecture & Consolidating backend services platform, for enhanced business availability & continuity via Innovation, Automation & Optimization

We Design, Propose, Demonstrate and Deliver with Latest Microsoft frontend, backend & back-office renovation Infrastructure Architecture as part of Continuous-Service-Improvement: comprises of multi-site, multi-environment & virtualization/cloud computing to: Accommodate existing needs at its best & future growing business overloads. To enable day-to-day support staffs well understand easy & meaningful infrastructure concepts instead remembering it. Maintain & enhance uniformity. Latest Infrastructure Architecture Design, Improvements & Enhancements with the best suitable strategies Includes but not limited to:

Renovating, Upgrading & Migrating from the existing to latest Back-end AD & Back-Office, Backend & Front-ends upgradation, Implement latest comprehensive front-end & backend Analytical & comprehensive naming conventions & IP Schemes, Servers Physical, Logical SAN Disks/storage segregations, Mailbox Sizes Grouping & segregations, configurations standardizations, re-organize Groups, Group-policies & Security policies, Organization-Units, Assigned Rights. Cross-checking/delivering all business-related apps functionalities & integration with other platforms in co-ordination with multiple vendors, Department, Teams, Management, Process and Functions. Virtualization/Cloud: To minimize the physical maintenance & enhance management & support: implemented Virtualization/Cloud Migration of All Physical Back Office, Apps and Resource Servers to Virtual/Cloud Enhanced Capacity servers & workstations as Migration from Physical to Virtual Servers (virtualization).

Security & Compliance Hardening: enabled auditing of Enterprise & Domain Admin credentials to track & maintained approved controls. Re-evaluate Local Admin Access by the concerned staff direct manager, management & information security management to justify the need & grant or reject the privileges. Integration-Layer Uniformity/Standardization with other apps, services & shares standardization using only service account to enhance security & uninterruptable functionality (due to the non-expiry & other dependencies unlike normal user accounts. Composition of Baseline Standard forms, Preventive Maintenance Checklists, Procedure Manuals, Organized Assets Inventory & Release/Patch Management Process & Implementation for Domain, DNS, DHCP, Messaging System & Document Management system hosting.

Updates & Releases Automation, Apps, Antivirus. H/W & S/W Inventory of IT Assets, Automated Monitoring Critical Services and Resources Alerts Generations, Incident Creations & automated resolutions upon approvals. Enhance Alerts, Event & Incident Management. Storage Segregation and allotment: as Dedicated Software Repository, Department File Repository, Users Home Drives Mapped to back up their important data on centralized & safe location in SAN. Standardization of daily, weekly, monthly backups.

IT Infrastructure Architecture - Automation

We provide clients with complete, latest & robust infrastructure setup framework resulting in enhancement of business efficiency, security, and growth in today's digital landscape.

We understand the Client's Core Purpose of an IT infrastructure & aids to solve by composing it to achieve goals & implement the business strategy via

- Reducing cost for IT Projects
- Simplifying scaling
- Increasing the organization's productivity

For well-building client's IT Infrastructure: we implies

- Convenient, secure storage and data management
- Network interaction support, collaborating devices and users
- Optimal distribution of computing resources
- Data Protection: unauthorized access and leaks
- Providing core & noncore applications/services for business execution.

Provide the following IT Infrastructure frameworks Types

- Traditional Infrastructure Framework: implies an on-premises/on-site approach, Provisioning with hardware, software, network & security.
- Cloud Infra: we provides the placement of IT infrastructure components with a cloud provider & maintain uninterrupted operation, along technical support and managing it remotely.
- Hybrid Infra: we provide combined traditional and cloud IT infrastructure "partial infrastructure on client's premises and partial in cloud services. allowing client to evenly distribute the available capacity.

IT Infrastructure Creation from Scratch by considering the unique needs of the company, its goals, and budget.

- Assessment & Variation of Organization's technological needs depending upon domains (Banking, Telecom, Government/Military, Oil & Gas, Hospitals, Mid & Small sized etc.) Data/Resource Management
- Developing comprehensive IT Architecture setup: hardware, software, network etc. Procuring approved assets/renting / cloud service.
- Deployment of entire IT infrastructure using best professionals & testing/evaluating to ensure optimal performance, security, and functionality.

INTELLECTUAL CREATIVITY
FOR INFORMATION TECHNOLOGY

IT Infrastructure Architecture - Automation

We provide clients with not just complete infrastructure maintenance, but Transforming Managed Services Architecture & Consolidating backend services platform, for enhanced business availability & continuity via Innovation, Automation & Optimization

Efficient IT Infrastructure Management Services is key for the efficient operation of modern businesses. Hence we provision supporting daily operations, enhancing security, and ensuring scalability, enabling client meeting evolving technological demands. As businesses depend more on technology for service delivery, data management, and collaboration, a well-optimized IT infrastructure is crucial for maintaining competitiveness and achieving long-term success. Hence our Service infrastructure management plays a vital role in ensuring that systems are secure, reliable, and efficient, contributing directly to business continuity and growth. Key services include:

Ensures Business Continuity

Downtime can be devastating for businesses, leading to lost revenue and a damaged reputation. Hence our IT infrastructure management ensures that systems are consistently monitored and maintained, minimizing the risk of outages and ensuring business continuity. With proactive management, issues can be detected and resolved before they escalate.

Enhances Security

As businesses become more dependent on digital technologies, the risk of cyber threats increases. Thus our IT Infrastructure Management Services incorporates robust security practices, such as regular updates, firewall protection, and data encryption, to protect sensitive information and ensure compliance with regulatory standards. This is crucial to maintain customer trust and prevent costly security breaches.

Optimizes Performance and Efficiency

By monitoring the performance of entire infrastructure, businesses can optimize resource allocation, streamline workflows, and ensure that all infrastructure components are operating at peak efficiency. This leads to improved productivity, faster decision-making, and reduced operational costs.

Supports Scalability and Growth

As businesses grow, their IT needs evolve. IT Infrastructure Management Services ensures that infrastructure can scale to meet growing demands, whether that involves adding more servers, upgrading software, or integrating cloud services. As a scalable IT infrastructure is key to supporting business growth without disruptions.

Reduces IT Costs

Our Efficient Infrastructure management allows businesses to identify and eliminate inefficiencies, optimize resource usage, and extend the life of hardware. This results in significant cost savings over time, as businesses can avoid costly downtime and reduce the need for frequent upgrades.

IT Applications & Integration - Automation

IT Applications: Analysis ➤ Implementations ➤ Maintenance ➤ Management (Outsourcing / Managed Services), Banking-Applications-Framework: Retail-Banking ➤ Corporate-Banking ➤ Investment-Banking ➤ Remittance-Banking ➤ Web-Services ➤ Batch-Process ➤ ETLs ➤ Integration Automation & Consolidation

Comprehensively Banking Applications-Architecture prospective is entirely dominant by Business-Delegates-Strategies via which it operates: The most robust applications & its architecture it possesses: the most influential it is.

Enable its client's Application Management shifts the focus of IT from technology performance to business performance by acquiring and Implementing client's applications to production upon reviewing business needs, evaluating multiple vendors, solution & service providers, and evaluating software functionalities, Supporting and Maintaining in Production & Enhancing with several automations, batch process, services, settings & other configurations on timely basis in Co-Ordination with Vendors, Solution Providers, Service Providers, Various IT departments & Teams and business representatives.

IT BUSINESS - Augmentation

Banking & Telecom: Business-Analysis, Renovations & Transformations | Functions & Process Improvements

Extensively Banking Business-Delegates-Strategies prospective is entirely dominant by its Clients & Customer Satisfaction extent, To Achieve Best results, banking-business-delegates will struggle to enquire & deliver what their Clients & Customer needs are. The digital era demands a new approach to business management. Companies need to continuously innovate, evolve and integrate their strategies to achieve better business outcomes. In an era of consumerism, digital and data disruption, clients are examining their business and operating models to find a solution that will enable a step change in performance. Superior decision making, business outcomes and customer experiences is being achieved by clients prepared to reinvent business processes with “intelligent operations” that harness talent, data, and intelligence to deliver the right information where and when it's needed.

revolutionizing the way business strategies are developed and managed with Liquid Application Management. Our approach to New IT enables our clients to automate their business, consolidate IT to improve efficiencies across people, applications and vendors, and to achieve unparalleled speed, agility, productivity and efficiency gains.

As a liaison between Business & IT, Transformed numerous banking processes from Manual to web-based-Automations delivering in compliance with Business-Application-Infrastructure Architectures to benefit bank Business building resilience & to stay with the abreast of renovation, to Increased Accuracy, Quality, Service & Operational efficiencies (missed-entries, records, wrong-feeds, resource-absent or left), Accurate Calculations, Applying-Exact-Business-Rules per each & every record, Streamlined-Hierarchical-Reviews-Approvals, Validations/confidentiality, Automated generated entries as logs for Reviews, Audits & Governance to be accessed instantly. Minimize human error across a wide array of activities, Minimized Time & Efforts utilized etc.

will Interact with Business to Gather-Detailed-Requirements, Initiate-Process along Documentation-Compositions (like: PDMs, KOMs, BRDs, PIAs, Detailed-Project/Quality/Resource/Rollout-Plans, RFI/RFQs, Vendor-Evaluations/Contracts, Solutions/Technical-Design-Documents, Developments & UATs, Training/User/Operations-Manuals-Checklist-Procedures, Deployments/Implementations, Closure-Documentation/Process/Reporting) etc.

Operations Support Services - Automation

Operations 4 phased Support: Acquire ➤ Stabilize ➤ Modernize ➤ Optimize Clients Services for Business Continuity

Executive Abstract

- Aligning the transition, migration and transformation of Client support management to your technology strategies and key business objectives enables you to achieve long-term cost reductions, service improvements and optimized service use.
- support management solution provides a combination of flexible services to help you transition to a stabilized environment and ultimately transform to fully optimized, leveraged end-user's operations.

Technical Abstract

- Precisely: upon acquisition, retaining it overall with current ongoing operations life-cycle.
- Secondly as part of continuous service improvement process CSI, with all deep analysis, root-cause-analysis, will gather reviews from client's existing Infrastructure, Business and applications architecture from various previous support summaries, reports, business delegates, IT departments and teams, Vendors, Solution and service providers,
- will re-establish, implement and segregate to streamline process, functions and resources with the entire front-end banking infrastructure management proficient to afford large branch network and operations by transforming business all collection requirements into well working systems, solutions to ease front-ends continues, daily, weekly, monthly and yearly tasks and operations via
- applying strict following the best support hierarchy (upon developing professional operations-flows, steps, procedures, checklist, forms and operations manual for Management, Technical-support & users).

Operations Support Services - Automation

Operations 4 phased Support: Acquire ➤ Stabilize ➤ Modernize ➤ Optimize Clients Services for Business Continuity

Stabilize

When transitioning responsibility to a service provider, the most important thing is stabilizing the IT environment. Changes should be kept to a minimum until the existing support environment is stable. Matching service levels to your needs, we manage and monitor your support in the stabilized environment 24 hours a day, seven days a week. As a result, support reliability, security, and recoverability increase.

1

Modernize

Transitioning to a new service provider and services create an opportunity for you to make improvements to your existing front-end environment. When taking over support environment, we automate service delivery, standardize platforms, applications & provide decision-support tools for better managing your business. During the transition, we continue consolidating front-ends to eliminate redundancy.

2

Optimize

Simplifying and modernizing your front-end infrastructure and application stack, creating a shared-services front-end environment, and making sure your users and customers have consistent access to data are key features of optimizing your front-end environment. We help you realize additional business value by automated and remote support to increase usage of existing assets.

3

Operations Support Services - Automations

Helpdesk Process Management System Framework “End-user and Deskside support Service”

Why We? Rather any Deskside support vendors maintain dedicated Deskside support only and rest various banking frontend products has additional support providers and contracts, in which bank's hassles is to: Manage maintaining numerous solutions and service providers and contracts, Suffer Support latencies: as often vendors will not accept the accountability of except their products.

Hence we brought a single overall frontend-support-solution to delivers end-user's overall requirements and offers Implementation & Support Services platform (frontends & backend: Hardware-Setup, Network-Setup, OS-Setup, Applications-Setup including Information-Security/Compliance). We have assisted customers with the successful deployment of similar business solutions; we are committed to Banking's success and is confident that our solution addresses Client's critical business requirements.

Aside from hardware and software organizations, We interact with industry leaders Microsoft, McAfee, Symantec, VMware, Intel, SQL, Oracle and business & client's applications to provide best-in-class integrated business solutions consisting of hardware, software and services. The result is a top-performing environment for your business applications delivery maximum efficiency, security, productivity, and user satisfactions - geared to how you do business.

We will suggest you with the best upon which you can select and define which services to use, how to use them, what products to employ, and which security policies to enforce. Using our skills, experience, and resources, we not only optimize your current environment, but also advise on and implement programs to improve performance, reduce your total cost of ownership, and help enhance the quality of your professional support systems.

INTELLECTUAL CREATIVITY

Operations Support Services

Helpdesk System Framework “End-user and Deskside support Service”

Help Desk: A single point of contact (Management and consolidation of contract, Parts ordering and management, Single source for problem reporting, escalation and resolution). We'll provide you an online web based Helpdesk system:

- To log daily problems, track / monitor the status / progress, close them with confirmation.
- Review them monthly/quarterly/yearly know what was served & to improve further if you feel like.
- Maintaining Reporting kind of functionality. This will help each one of us to be in sync every often being anywhere.
- Auto escalation emails with every 3 hours if status left unchanged.

Help Desk Professional: We'll provide you with helpdesk personnel:

- On daily basis, they will be calling each branch every morning to inquire about the system.
- If there is any problem, they will immediately log the problem in the system & simultaneously arrange an engineer to work on it.
- Will call engineers every hour to know & update current status.
- To offer support in ladies & gents, we'll assign ladies & gents to deal with Client's personals comfortably. They will be eligible & fluent in English & Arabic speaking.
- They will enquire & close the logs by the branch personnel verbal, email & dully-form-user-signed confirmations.

Support Professionals:

- We'll provide resident professional field engineers to support Client's enterprise.
- Client doesn't have to guide on every visit with steps to resolve problems by phone spending their time & energy.
- If enterprise/organization/client provides them remote access, then they could solve their problems remotely with a less time saving their travelling time.

Support Professional Tools:

- We'll provide complete tool kit along including Cable tester, software & firmware etc. for each engineer to resolve Hardware, Software, Operating System, Application & configurations raised issues.
- If an engineer is visiting any branch, he doesn't have to come back without user acceptance & signed confirmation.
- We'll provide complete Checklists, Forms, Procedures & Documents for professional smoother & convenient service delivery.

In Precise Offers with:

- Help-Desk System to Log a problem online being anywhere.
- Help-Desk Members to enable efficient service delivery.
- Resident Professionals of Solution to Support enterprise/client/organization in each region (Eastern, Central & Western Region).
- the entire tool kit for each engineer to resolve problems in terms of LAN cabling, software Hardware, Software, firmware, Operating System & Applications level tools along with media to resolve problems in single visit itself.

Project Support Services

Project Management & PMO, ITIL & ITSM, Business Continuity Framework

IT Projects Management:

PMs Team will establish relationship with various internal / external stakeholders, to garner support required for the projects. Analyze business and technical objectives. Plan, Segregate, Formulate & Scope business & systems requirements from Big Picture to detail level work breakdown structure. Executing, Monitoring & Delivering project plans keeping a close track of the developments & progress within pre-set budgets and scheduled deadlines by self or by directing & monitoring staff throughout the implementation, updating the top management & ensure that all business requirements are incorporated into the design & delivered within time, cost & effort parameters. Keeping abreast of SAMA, company strategy and policy and being able to identify its impact on projects & Testing business applications from business perspective. Perform ad hoc analysis and problem investigation as needed by acting as a liaison between business & technical stakeholders. Documenting & writing business requirements, cases, statements of work and specifications in a manageable and non-intrusive way.

ITIL & ITSM Management:

Highly Skilled & Experienced in Service Design, Transition, Operations & Continual Service Improvement best practices & processes and also helping transitioning the existing set of clients to the Global process standard.
